

7 Series—Fire Safe

2-way, 3-piece Bolted Ball Valves

HOKE's 7 Series Fire Safe Valves meet demanding application requirements in the production environment of chemical and petrochemical processing facilities. These valves have been tested to and meet the requirements of API 607, 4th edition for soft-seated valves. API 607 measures the ability of a closed soft-seated ball valve to retard the propagation of a fire (downstream and to atmosphere). The 7 Series Fire Safe Valves offer high flow, safety, and flexibility in a variety of end connections and sizes. This series is available in fractional sizes from ½" to 1" and in metric sizes from 12mm to 25mm in tube and pipe ends.

Typical Applications

- Chemical processing
- Petroleum refining
- Gas distribution
- Hydraulic fluids

Technical Data

BODY MATERIAL*	316 stainless steel, grade CF8M
MAXIMUM OPERATING PRESSURE	1500 psig @ 70° F (103 bar @ 21° C)
OPERATING TEMPERATURE RANGE	-40° F to +500° F (-40° C to +260° C)
ORIFICE SIZE	0.28" to 0.88" (7.1mm to 22.3mm)
Cv FACTORS	4.5 to 38
END CONNECTIONS	GYROLOK ® tube fittings, female NPT, tube socket weld, pipe socket weld, pipe butt weld

* Consult factory for other materials

Features & Benefits

- Bottom-loaded stem prevents stem blowout for added safety.
- Fully encapsulated bolts are protected from the environment, extending valve life and reducing costs.
- Optional trip-proof or latching/locking handle prevents accidental opening or closing of the valve for a secure process.
- Optional fuse plugs are available on actuators for added safety.
- Fire-safe design retards the propagation of a fire downstream or to the atmosphere, enhancing safety and increasing the range of possible applications.
- Handle provides a visual indicator of whether valve is in the open or closed position, enhancing safety.
- Stem flats provide visual indication of valve position, improving safety.
- Actuators can be mounted to valves without disrupting the packing, seats or seals. Installation time and costs are minimized.
- Special High Tolerance NPT Thread

Materials of Construction

#	DESCRIPTION	MATERIAL
1	Seat*	PTFE**
2	Packing*	Grafoil®
3	Body seal*	316 stainless steel, PTFE coated
4	End plate*	316 stainless steel, grade CF3M
5	Body*	316 stainless steel, grade CF8M
6	Stem*	316 stainless steel
7	Ball*	316 stainless steel
8	Packing nut	316 stainless steel
9	Thrust washer*	PTFE or PEEK™
10	Handle	316 stainless steel
11	Stem nut	316 stainless steel
12	Body bolt	316 stainless steel
13	Body nut	316 stainless steel

Other materials available upon request.

* Wetted Components

** PTFE seat is modified to reduce cold flow and increase durability without losing inert property.

7FF Cv Range 27 - 38

SEAT & SEAL MATERIAL

See 'Seat & Seal Materials' table below

P1 INLET PORT END

See 'Port End Type' table below

P2 OUTLET PORT END

See 'Port End Type' table below

BODY & END PLATE MATERIAL

Y 316 stainless steel
 Consult factory for other materials

MISCELLANEOUS OPTIONS

0 None
 1 Upstream vented ball

NUT, BOLT, STEM NUT & LOCKING BRACKET OPTIONS

1 316 stainless steel, per ASTM A193 B8M
 2 316 stainless steel - NACE compliant**

CLEANING OPTIONS

S Standard cleaning per HPS-1 & -2
 A Industrial oxygen cleaning per HPS-18
 B Chlorine service cleaning per HPS-172

ACTUATION OPTIONS

0 316 stainless steel lever handle
 1 316 stainless steel locking lever
 2 316 stainless steel oval handle
 3 316 stainless steel locking oval handle
 4 316 stainless steel extended oval handle
 5 Actuator, double acting
 6 Actuator, spring return normally closed
 7 Actuator, spring return normally open
 8 Actuator, spring return normally closed with fuse plug
 L 316 stainless steel oval latching handle

** Per NACE MR0175/ISO 15156 the user must determine if this product is satisfactory for use in its intended environment.

Cleaning Options

- HPS-1** Cleaning procedure to remove oil and grease from metal valve parts with solvent vapor- and solvent ultrasonic vapor degreasers.
- HPS-2** Cleaning procedure to remove dirt, oil, and grease from non-metallic parts with non-ionic detergent and water solution.
- HPS-18** Cleaning procedure to remove oil, grease, and other contaminants from the valve and fitting components prior to assembly for industrial oxygen service.
- HPS-172** Procedure to clean and package valve parts and assemblies for use with dry chlorine gas or liquid.

For Your Safety

It is solely the responsibility of the system designer and user to select products suitable for their specific application requirements and to ensure proper installation, operation, and maintenance of these products. Material compatibility, product ratings and application details should be considered in the selection. Improper selection or use of products described herein can cause personal injury or property damage.
